

Knox Horticulture brings in Stage 3 Tissue Culture from Vitro Plus, the world's Fern leader. We produce up to 5 million fern liners per year and ship them throughout the US and Canada between Ship Week 25 and Ship Week 45. We recommend a minimum lead time of 6 months for us to schedule the Tissue Culture material.

We bring in stage 3 tissue culture material and transplant them into 72-cell trays

Newly-transplanted 72-cell trays can take advantage of our Florida sunshine

Ready to ship to the customer
